PROFILE

To obtain a challenging position as a front-end developer utilizing my skills in HTML, CSS, JavaScript, and various frameworks such as ReactJS to create responsive and engaging web applications. I am eager to utilize my experience in building intuitive user interfaces and my passion for emerging technologies to contribute to a dynamic development team and to help drive the success of the company.

EMPLOYMENT HISTORY

Customer Success Engineer, Pillir (Formerly appsFreedom India Private Limited)
Chennai, India

Apr 2022 — Present

- Build the tool for running the bulk automation scripts using React JS and APIs are build in express.js.
- The tool can create new test run with respect to project, suite, runs which is already exists in Test-rail (Test case maintanance platform) by using the testrail API's which provided by Testrail.
- Run the newly created test run with automation scripts written using Cypress, which may consist hundreds of cases .
- Status of each cases (Passed, failed, etc) are added to Test-rail with screenshots instantly after each case is executed.
- Developed front-end of B2B applications with low code platform and Integrated it with Backend which can be compatible to all devices like android, ios, web.
- Automated test cases using JS testing framework called Cypress.
